### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. A telephone call was made to Donald Townsend, Reg. No. 22,069, on March 25, 2002 to request an oral election to the restriction requirement below, but did not result in an election being made.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 14 and 15 drawn to iontophoresis apparatus, classified in class 604, subclass 20.
  - II. Claims 12 and 13 drawn to method for detecting physiological substances, classified in class 604, subclass 501.
3. Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the applicator can be used to detect something beside a physiological substance.
4. If applicant elects Group I that he/she is further required to elect between combination and subcombination as detailed below.
  - III. Claims 14 and 15 are drawn to the combination of an iontophoresis system, classified in class 604, subclass 19
  - IV. Claims 1-9 are drawn to the subcombination of an iontophoresis apparatus, classified in class 604, subclass 20.

Art Unit: 3743

V. Claims 10-11 are drawn to the subcombination of an iontophoresis applicator, classified in class 604, subclass 47.

5. Groups III, IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed can operate as an iontophoresis system with any iontophoresis device, which is not determinative as to the thickness for detection, what the secreted substance is composed of, and what the area of absorbability is. The subcombination has separate utility such as forcing ionic drugs by establishing an electric field, and detecting and absorbing living tissues, blood and cells.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
